

PRINCE2® Practitioner Prep and Exam

Introduction

PRINCE2® is the project management method that provides a guiding framework of processes, principles and techniques and has been proven to be effective on a vast array of projects.

PRINCE2® offers a business-based and generic, rather than technically-specific, approach that can be readily applied to a wide variety of large and small commercial and non-commercial projects. PRINCE2® works equally effectively in a stand-alone, or a programme environment.

Steria's PRINCE2® Practitioner Prep and Exam course conforms to the syllabus set down by APMG (the examination administration body) for delegates wishing to gain the PRINCE2® practitioner certificate.

Who Will Benefit?

This course has been specifically designed for candidates holding the PRINCE2® foundation certificate who now wish to take the next step and become a registered PRINCE2® practitioner. It is also suitable for registered practitioners wishing to take the PRINCE2® re-registration exam (required every 3 to 5 years).

Others might include:

- Project managers who need to apply the method, or who wish to assess its applicability for their project or across their organisation
- Business managers who are tasked with undertaking a project
- Programme managers wishing to understand how PRINCE2® operates
- Project team leaders, project support personnel and project auditors will benefit from the practical insight offered by this course into the flexible application of PRINCE2®
- Project office managers who wish to gain a detailed understanding of the method with a view to implementing it throughout their organisation
- Consultants who require the qualification and an understanding of PRINCE2®, in order to successfully apply the method for their clients

Course Content

- Refresher on the scope, components and processes of PRINCE2®
- Organisation

- Management of risk
- Handling exception situations
- Product based planning
- Quality
- Change control
- Business Case
- Controls
- The PRINCE2® processes:
- Examination technique
- Mock examinations

The course is delivered in an entertaining and highly interactive manner with many real life examples used to illustrate the subject. There is a high degree of delegate participation, examination preparation and practice.

Prerequisites

Attendees must be current holders of the PRINCE2® foundation certificate. Re-registration candidates must be PRINCE2® registered practitioners, who gained the qualification not less than three years ago and not more than five years ago.

Delegates are sent a copy of the PRINCE2® manual prior to the course, pre-reading will dramatically increase the chance of success in the examination preparation and practice.

Duration

This is a two-day course comprising one days training with the examination on the second day. Re-registration candidates wishing to take the examination electronically will make their own arrangements to do this and may leave the course at the end of day one. They will otherwise sit a 1 hour paper on the second day. You will be expected to undertake evening work, as homework will be set on this course.

Examinations

The Practitioners examination lasts three hours. There are nine multi-part questions, all compulsory, from a syllabus which covers eleven subject areas. The exam applies the PRINCE2™ methodology to a single scenario with additional information given for each question.

Each of the nine questions addresses a different aspect of PRINCE2™ and, over the whole exam, an overall score of 50%, or greater, is required to pass. The style of the questions are described as being Objective Test Exam format

The examination is open-book format allowing the use of the PRINCE2™ manual to be taken into the examination, but does not allow any other paper-based or electronic reference material.

Accreditation

This course is accredited by the APM Group.
